### Introduction

### Hafa Adai!

**Christine Calvo** 

Welcome to the 2011 Nene Directory, your guide to services for everything having to do with infants and young children.

Looking for a pediatrician? Trying to locate a nearby day care center for your toddler? Have a child with Down Syndrome and are looking for a group that has this specific focus? The 2011 Nene Directory is your link to these resources.

This directory specifically targets services for young children. It is organized in three sections that highlight health, education, and family support services, that address the needs of young children from birth to five years and how to connect with the increasing resources and services available in our community.

The developers of this directory have worked hard to ensure that the information contained here is current and up to date. However, we know that contact numbers and program descriptions may change, so if you find that information is incorrect, please help us to update our listings by calling Guam CEDDERS at 735-2477 or by sending an email message to margie.johnson@guamcedders.org.

Early childhood is one of my highest priorities as your First Lady. Please use this guide and share the information with others so that we all may, as a community, support our youngest and most precious citizens.

Sincerely,

Christine Calvo First Lady of Guam

## Emergency Preparedness

### Prepare, Plan, and Pack

Emergency situations can happen at any time, and at any place. Whether natural or man-made, these emergency situations can result in damage to property and endanger the health and safety of the general public.

Guam regularly experiences natural disasters such as typhoons, earthquakes, and floods. Fires and disasters from hazardous materials are other occurrences that may endanger you and your property.

#### **Prepare Basic Supplies**

In the event of an emergency, you should be prepared to be self-sufficient for up to seven days. Preparing and maintaining an emergency supply of essential items can help ensure that you have adequate supplies to meet you and your family's needs until help arrives.

#### Basic emergency supplies include:

- One week supply of canned and dried food items
- Drinking water at least one gallon per person per day
- Flashlights and extra batteries
- Battery operated radio
- First Aid kit
- Whistle
- 10 30 day supply of medications
- · Toilet tissue and personal hygiene supplies
- · Water for flushing toilet in the event water is shut off
- Trash bags, gloves, duct tape or masking tape, and plastic containers for storing items
- · Chlorine bleach for sanitizing
- Propane stove and extra propane gas

### Emergency Preparedness

#### Make a Plan

Emergency preparedness also means making a plan.

#### Your plan should:

- Designate a place to meet if you and your family are separated from each other.
- Pick a primary and alternate contact number for you and your family to call if you are separated from each other.
- Establish a buddy system with other family members, friends, neighbors, or co-workers, and develop a plan on how you can help each other.
- Share your plan and your emergency contact list with members in your buddy system.
- Make a plan on how to secure your house in case you are not home or you are otherwise unable to secure your home.
- Identify another place to go to in case you need to evacuate.
- · Establish your primary and alternate evacuation routes.
- If you use mobility aids, plan on how to take them with you and how to store extra aids at your alternate shelter, if possible.

#### Pack a GO-KIT (Disaster Supply Kit)

You should prepare a bag with your most essential items which you can grab if an emergency situation occurs, and you need to evacuate right away. Be sure the bag is not too heavy for you or someone to carry.

#### Your emergency GO-KIT should include:

- List of contact numbers
- Dried foods and bottled water
- Flashlight and extra batteries
- Whistle
- Small portable radio and extra batteries
- · Basic toiletries and sanitary items
- Medications
- Important documents, including medical information

#### It is a good idea to:

- Place your bag near an entry or exit way so it can easily be carried out.
- Put reminder notices in your calendar or appointment book to check and replace items in your bag at least every 6 months.
- Let people in your buddy system know where your GO-KIT is located.

### Government Numbers

NOTES			

### Health Services

#### **Tips for Families**

- Eat foods that are good for you vegetables, fruits, grains, and dairy foods.
- Get daily exercise walk with your baby, play outside with your toddler or preschooler.
- NEVER shake your baby! Don't throw your baby, even if you are playing, as this may cause the brain to swell, bleed, or bruise which can cause blindness, seizures, intellectual disability, other disabilities, or even death.
- Arrange for your child to receive regular check-ups and scheduled immunizations.
- If you call your doctor's office/clinic, be sure to get the name of the person you speak with in case you need to call back or if questions come up.
- Ask the clinic if they accept walk-ins and if there are any payments to be made up front.
- Be sure to verify the type of insurance (including Medicaid), the doctor/clinic will accept.
- Ask what types of payment are accepted cash, check, and/or credit card.
- Make sure you have the necessary documents to help get the most out of your child's visit – shot records, medical history, medications (type and dosage), insurance, guardianship, etc.

### Educational Services

#### **Tips for Families**

- When choosing a child care center, cost should not be the only consideration. Think of health and safety, trained and loving teachers, and toys and materials that are educational and appropriate for your child's age.
- Anyone can love a child who is easy to care for and is in a good mood. Look
  at how a caregiver handles a crying, tantruming child. Notice whether the
  caregiver responds with love, patience, and positive, calm words, or with harsh
  and unrespectful words and actions.
- A high quality child care center will help your child learn about himself, his feelings, other people, communication, physical movement, and thinking skills.
- Take time each day to talk with your child's teacher. You are partners in providing the highest quality of care and education.

# Family Supports and Family Support Groups

#### **Tips for Families**

- Parenting is the biggest challenge you will face. It is okay to ask for help when
  you need it.
- To take care of your baby, you need to take care of yourself.
- Your child's doctor is a good resource for assistance in finding other people who can help you be the best parent you can be.
- Your child's teacher is a good resource for teaching strategies and finding other services and supports for your child and your family.
- Take the time during the early years to teach and love your child. The more time
  and energy you put into these years, the less heartache and challenge you will
  have when they are older.
- When feeding, diapering, or bathing your baby, spend time singing, cuddling, and talking during these caring routines to support your baby's development.
- Children never outgrow their need to be touched gently and often it helps them feel secure and calm so they continue to learn and grow.
- Provide a variety of sensory experiences taste, touch, smell, sight, sound to help build your baby's brain.
- It is never too early to introduce books to your baby.
- Play is how young children learn best.
- Children learn from your example.

Agency	Description of Services	Contact Information
