# Emergency Preparedness

## Prepare, Plan, and Pack

Emergency situations can happen at any time, and at any place. Whether natural or man-made, these emergency situations can result in damage to property and endanger the health and safety of the general public.

Guam regularly experiences natural disasters such as typhoons, earthquakes, and floods. Fires and disasters from hazardous materials are other occurrences that may endanger you and your property.

## Prepare Basic Supplies

In the event of an emergency, you should be prepared to be self-sufficient for up to seven days. Preparing and maintaining an emergency supply of essential items can help ensure that you have adequate supplies to meet your and your family's needs until help arrives.

### Basic emergency supplies include:

- One week supply of canned and dried food items
- Drinking water – at least one gallon per person per day
- Flashlights and extra batteries
- Battery operated radio
- First Aid kit
- Whistle
- 10 - 30 day supply of medications and medical supplies
- Toilet tissue and personal hygiene supplies
- Water for flushing toilet in the event water is shut off
- Trash bags, gloves, duct tape or masking tape, and plastic containers for storing items
- Chlorine bleach for sanitizing
- Propane stove and extra propane gas
- Cell Phone with charger, extra battery
- Can Opener
- Roll up mat and blankets
- 3-day supply of change of clothes
- Sturdy shoes
- Lighter
- Formula (powder or liquid)
- Baby food
- Disposable diapers
- Change of clothes, bibs, blankets
- Baby soap, shampoo, powder, lotion and wipes
- Disposable gloves/Hand sanitizer
- Favorite toy, blanket, stuffed animal or books
- Paper products (plates, spoons, forks, and paper towels)

# Emergency Preparedness

## Make a Plan and Practice your Plan

Emergency preparedness also means making a plan.

### Your plan should:

- Designate a place to meet if you and your family are separated from each other.
- Pick a primary and alternate contact number for you and your family to call if you are separated from each other.
- Establish a buddy system with other family members, friends, neighbors, or co-workers, and develop a plan on how you can help each other.
- Consider including your children in your planning, preparation, and other activities to help them understand the importance of emergency preparedness. Children learn from your example.
- Share your plan and your emergency contact list with members in your buddy system.
- Make a plan on how to secure your house in case you are not home or you are otherwise unable to secure your home.
- Identify another place to go to in case you need to evacuate.
- Establish your primary and alternate evacuation routes.
- If you use mobility aids, plan on how to take them with you and how to store extra aids at your alternate shelter, if possible.

## Pack a GO-KIT (Disaster Supply Kit)

You should prepare a bag with your most essential items that you can grab if an emergency situation occurs and you need to evacuate right away. Be sure the bag is not too heavy for you or someone to carry.

### Your emergency GO-KIT should include:

- List of contact numbers
- Dried foods and bottled water
- Flashlight and extra batteries
- Whistle
- Small portable radio and extra batteries
- Basic toiletries and sanitary items
- Medications and medical supplies
- Important documents, including medical information

### It is a good idea to:

- Place your bag near an entry or exit way so it can easily be carried out.
- Put reminder notices in your calendar or appointment book to check and replace items in your bag at least every 6 months.
- Let people in your buddy system know where your GO-KIT is located.

# Government Numbers

## Office of the Governor and Lieutenant Governor of Guam

### Address:

Ricardo J. Bordallo Governor's Complex, Adelup  
P. O. Box 2950

# Family Supports

## Tips for Families

- Parenting is the biggest challenge you will face. It is okay to ask for help when you need it.
- To take care of your baby, you need to take care of yourself.
- Your child's doctor is a good resource for assistance in finding other people who can help you be the best parent you can be.
- Your child's teacher is a good resource for teaching strategies and finding other services and supports for your child and your family.
- Take the time during the early years to teach and love your child. The more time and energy you put into these years, the less heartache and challenge you will have when they are older.
- When feeding, diapering, or bathing your baby, spend time singing, cuddling, and talking during these caring routines to support your baby's development.
- Children never outgrow their need to be touched gently and often – it helps them feel secure and calm so they continue to learn and grow.
- Provide a variety of sensory experiences – taste, touch, smell, sight, sound – to help build your baby's brain.
- It is never too early to introduce books to your baby.
- Play is how young children learn best.
- Children learn from your example.

Concerned about  
your child's  
**HEARING?**

**FREE HEARING SCREENING** services are available.

To schedule an appointment, call the  
**Guam Early Intervention System (GEIS) at  
Telephone: 300-5776 / 5816**

# Parent Information: Your Baby's Hearing

Hearing can change at any time. Talk with your baby's primary care provider if anything on the list below applies to your baby now or in the future:

1. Either parent or other close family member had hearing loss as a child
2. Your baby was in the NICU for more than five days
3. Your baby had an exchange transfusion
4. Your child had/has many ear infections
5. Your child had/has a head injury
6. You don't think your child is hearing well
7. You don't think your child is talking well
8. Your baby's behaviors differ from the HEARING CHECKLIST

**Did you know?**  
**50%** of infants with hearing loss have no risk factors

## Hearing can change.

Monitor your baby's developmental milestones with the hearing checklist!

## ✓ HEARING CHECKLIST

### 0-3 MONTHS

- ✓ Startles or cries to loud sounds
- ✓ Quiets to familiar voices
- ✓ Moves or wakes up when someone talks

### 3-6 MONTHS

- ✓ Coos, gurgles, and makes a variety of voice sounds
- ✓ Looks toward loud voices or sounds
- ✓ Enjoys rattles or other toys that make sound

### 6-12 MONTHS

- ✓ Begins to imitate speech sounds ("baba," "mama")
- ✓ Understands "no" or "bye bye"
- ✓ Begins to turn head toward soft sounds
- ✓ Looks at familiar objects when named

### 12-18 MONTHS

- ✓ Readily turns toward all sound
- ✓ Recognizes name and understands about 50 words
- ✓ Moves from saying 2 words to 10 words
- ✓ Follows simple directions ("find your ball")

### 18-24 MONTHS

- ✓ Enjoys being read to
- ✓ Points to body parts when asked
- ✓ Starts to combine words, such as "more milk"
- ✓ Says 20-50 words and understands many more

## HELPFUL TIPS IN USING INTERPRETER SERVICES\*

- Address comments to the individual. Not only is this a sign of respect, the person may actually understand more than he/she conveys.
- Do not direct comments to interpreter as this ignores the individual and makes him/her feel discounted.
- Allow interpreter to use cultural norms in conveying message, communication styles.
- Speak slowly and allow interpreter to translate every few sentences.
- Ask for clarification to make sure information is conveyed and received accurately.
- Do not assume if person nods in agreement or says yes that he/she understands what was said.
- Own problem of communication; do not blame the individual you are serving.
- Review proceedings with interpreter in advance so he/she is familiar with your expectations of interview, evaluation, etc.
- Debrief with interpreter to see if there is information that needs to be clarified or may have been communicated non-verbally by individual.
- Allow for extra time.

## Linguistically Competent Practice:

- Use only trained interpreters to ensure accurate communication.
- Prohibit use of minor children as interpreters.
- Determine verbal, reading and writing proficiency of your interpreters.

## What an Interpreter is NOT:

- A Mental Health Clinician, therapist or diagnostician.
- They should not be placed in the position of making clinical decisions.
- They are not just a “dictionary”, i.e., they also bring invaluable cultural expertise to the sessions.

# Health Services

## Tips for Families

- Eat foods that are good for you – vegetables, fruits, grains, and dairy foods.
- Get daily exercise – walk with your baby, play outside with your toddler or preschooler.
- NEVER shake your baby! Don't throw your baby, even if you are playing, as this may cause the brain to swell, bleed, or bruise which can cause blindness, seizures, intellectual disability, other disabilities, or even death.
- Arrange for your child to receive regular check-ups and scheduled immunizations.
- If you call your doctor's office/clinic, be sure to get the name of the person you speak with in case you need to call back or if questions come up.
- Ask the clinic if they accept walk-ins and if there are any payments to be made up front.
- Be sure to verify the type of insurance (including Medicaid), the doctor/clinic will accept.
- Ask what types of payment are accepted – cash, check, and/or credit card.
- Make sure you have the necessary documents to help get the most out of your child's visit – shot records, medical history, medications (type and dosage), insurance, guardianship, etc.

## Is Your Child "At Risk" for Hearing Loss?

For more information log on to: [www.guamehdi.org](http://www.guamehdi.org)

### Has your baby experienced one of the following "risk factors" for hearing loss?

- There is concern about your baby's hearing, speech, language or development for any reason
- Your family has a history of family members born with hearing loss
- Your baby spent more than 5 days in the Neonatal Intensive Care Unit (NICU) or had complications while in the NICU (*Check with your health care professional*)
- Your baby experienced a lack of oxygen after birth
- Your baby needed a machine to help him/her breathe
- Was given medications that might hurt hearing (*Ask your health care provider*)
- Needed a special procedure (blood transfusion) to treat bad jaundice (hyperbilirubinemia)
- Was exposed to infection before birth
- Has head, face or ears shaped or formed in a different way than usual
- Has a condition (neurological disorder) that is associated with hearing loss (*Check with your health care professional*)
- Had an infection around the brain and spinal cord called meningitis
- Received a bad injury to the head especially if a hospital stay was required
- Was given medication for cancer chemotherapy

To schedule a **FREE HEARING SCREENING before six months of age** for your baby, contact the Guam Early Intervention System (GEIS) at Phone: 300-5776/5816 or e-mail: [geis@teleguam.net](mailto:geis@teleguam.net)

Produced by the Guam Early Hearing Detection and Intervention (Guam EMDI) Project. This project is supported by the Health Resources and Services Administration (HRSA) of the U.S. Department of Health and Human Services (HHS) under Grant No. H61MC2883, Universal Hearing Screening, and Intervention, \$378,191.00. This information or content and conclusions are those of the author and should not be construed as the official position or policy of, nor should any endorsements be inferred by HRSA, HHS or the U.S. Government.

# Educational Services

## Tips for Families

- When choosing a child care center, cost should not be the only consideration. Think of health and safety, trained and loving teachers, and toys and materials that are educational and appropriate for your child's age.
- Anyone can love a child who is easy to care for and is in a good mood. Look at how a caregiver handles a crying, tantruming child. Notice whether the caregiver responds with love, patience, and positive, calm words, or with harsh and disrespectful words and actions.
- A high quality child care center will help your child learn about himself, his feelings, other people, communication, physical movement, and thinking skills.
- Take time each day to talk with your child's teacher. You are partners in providing the highest quality of care and education.

# Guam Early Learning Guidelines:

**Birth to 36 Months  
3 to 5 Years**

Guam Early Learning Guidelines are great resources to assist parents, families, and caregivers in understanding what infants and toddlers are typically able to do as they grow and develop. The guidelines address the domains of development and include strategies that may enhance the overall development of all young children including those with special needs.
